## COUNT, CALCULATE AND COMPARE

### \*4TH GRADE REVIEW\*

Week of October 15, 2018

### Monday's Mastery of PLACE VALUE

Standard **3.NBT.2** Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.

1. Solve the subtraction problems below.

a.  $381 \text{ mL} - 146 \text{ mL}$

b.  $730 \text{ m} - 426 \text{ m}$

c.  $509 \text{ kg} - 384 \text{ kg}$

Parent Initials: \_\_\_\_\_

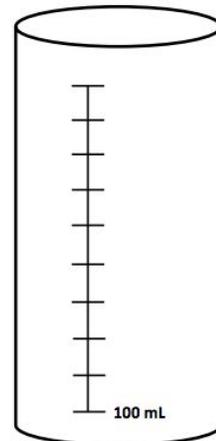

### Tuesday

Standard **3.MD.2** Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). 1 Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units, e.g., by using drawings (such as a beaker with a measurement scale) to represent the problem.

Label the vertical number line on the container to the right.  
Answer the questions below.

a. What did you label as the halfway mark? Why?

b. If you pour out 300 mL of water, how many mL are left in the container?

### Wednesday

Standard **3.MD.2** Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). 1 Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units, e.g., by using drawings (such as a beaker with a measurement scale) to represent the problem.

How much liquid is in each container?

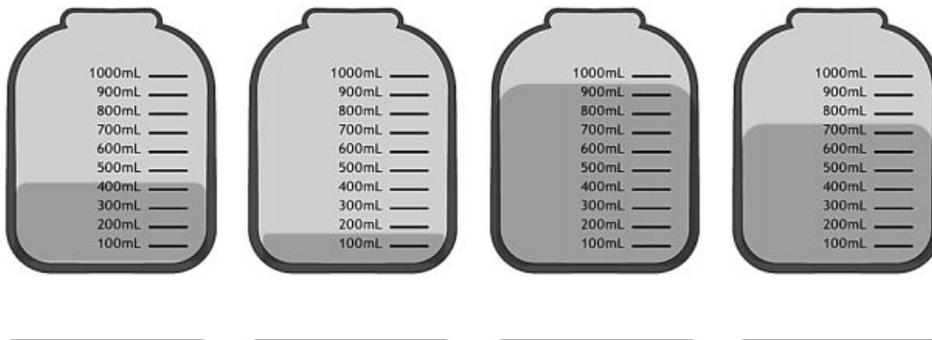

Parent Initials: \_\_\_\_\_

### Thursday \*College Bound Challenge\*

Standard **3.MD.2** Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). 1 Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units, e.g., by using drawings (such as a beaker with a measurement scale) to represent the problem.

Estimate the amount of liquid in each container to the nearest hundred milliliters.

Estimate the amount of liquid in each container to the nearest hundred milliliters.
