**COUNT, CALCULATE AND COMPARE**  
**\*4TH GRADE REVIEW\***  
**Week of December 3, 2018**

**Monday's Mastery of PLACE VALUE**

Standard **4.NBT.1** Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right.

Complete the following statements using your knowledge of place value:

- 10 times as many as 1 hundred is \_\_\_\_ hundreds or \_\_\_\_ thousand.
- 10 times as many as \_\_\_\_ hundreds is 60 hundreds or \_\_\_\_ thousands.
- \_\_\_\_\_ as 8 hundreds is 8 thousands.
- \_\_\_\_ hundreds is the same as 4 thousands.

**Tuesday**

Standard **4.OA.3** Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.

The ice cream parlor sold 12,978 chocolate and 2,349 cookie dough cones. It sold 1,870 more peanut butter cones than cookie dough cones and 899 more vanilla cones than chocolate cones. What was the total number of ice cream cones sold?

### Wednesday

Standard **4.OA.3** Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.

In the first week of July, a restaurant sold 9,543 hamburgers. In the second week, 1,069 fewer hamburgers were sold than in the first week. In the third week, 3 thousand more hamburgers were sold than in the first week. In the fourth week, 3 thousand fewer hamburgers were sold than in the first week. How many hamburgers were sold in all in July?

### Thursday \*College Bound Challenge\*

Standard **4.OA.3** Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.

Draw a tape diagram to model the following equation. Create a word problem. Solve for the value of the variable.

$$26,458 = 16,928 + 2,136 + A$$
